

professional summary

I have over 24 years continuous experience in the construction industry, covering various aspects including support/logistics, hands-on building experience and architectural experience; ranging from concept design through to project delivery. I have regularly established new techniques and practices to improve efficiencies and accuracy in the workplace. I also have a demonstrated track record of excellence both academically and professionally.

I am motivated, trustworthy and reliable. I show a high level of initiative and have a constant interest in improving my skills and knowledge. I accept any level of responsibility requested of me, with proven capability to work autonomously, and have shown to be dependable in meeting tight deadlines when required. My work is of an exceptionally high standard, and I exhibit a remarkable level of attention to detail. I have also shown a strong talent for problem solving and a distinct ability for lateral thinking.
